## Laboratory tables

Especially biochemical laboratories and radionuclid laboratories should always be easy to clean and to decontaminate. Furnitures in those rooms should have as less as possible edges, joints and hard reachable points.

**neuberger** laboratory tables with round tube legs are special suited for such areas.

### Laboratory wall work table with round tube legs

Worktop to choose. Worktop carried by levelable round tube legs. For a bigger knee room the legs are placed 350 mm after the front table edge. The worktop is additionally fixed to the wall. Max. leg distance: 1200 mm. The surface of the steel tube legs is powder coated.

Back square for the adjustment of mobile under bench units can be installed optional.

### Free-standing laboratory work table with round tube legs
