

**neuberger** balance tables consist of a melamine resin worktop with a single or a few cut outs 520 x 350 mm. 50 kg balance stones with mabrit-glass covers are mounted with vibration dampers on a tubular steel frame. Non-contact mounting of the steel frame with the casing. The balance table can be integrated into a long worktop, that means a nonstop worktop.

For installing bigger balances or instruments, we finish balance stones in the right size.
